

COPING WITH COVID-19

Best Practices for Fire/EMS and Law Enforcement

Whether you tuned in live on March 26 and 27 – where your peers shared some of their best practices for how they’re coping with COVID-19 – or you didn’t have a chance to join at all, we’ve got you covered.

You can hear a replay of how first responders on the front lines are working around the clock to assess and mitigate the COVID-19 spread nationwide. Hear how they’re handling street operations; dealing with potential infections among their own; preparing and sanitizing their stations and equipment; dealing with custodial issues; and ensuring they have the technology they need to effectively communicate.

The recordings are now available at the links below. If you did not previously register, you will need to register to access the FREE recordings.
